| [PORTOFOLIO](#)

As a final-year Information Systems student at UPNVJ, Faculty of Computer Science, I am highly interested in Software Development and Business Analysis. My coursework has provided a solid foundation in these fields, which I have further strengthened by pursuing opportunities to deepen my understanding. With communication and teamwork abilities, I have collaborated on various projects, gaining experience in working within team settings and sharing ideas effectively. I am eager to take on career opportunities in Information Systems, applying my knowledge and enthusiasm to contribute to the industry.

EDUCATION

UNIVERSITY PEMBANGUNAN NASIONAL VETERAN JAKARTA - DKI Jakarta, Indonesia

BACHELOR'S DEGREE, INFORMATION SYSTEM

Jul 2022 - Jun 2026 (Expected)

- GPA: 3.89/4.00

Relevant Course: Data Engineering, Big Data, UI/UX, Database Systems, Data Structures and Algorithms, Web Programming, Mobile Application Programming

WORK EXPERIENCE

PT Darya Varia Tbk - DKI Jakarta

March 2025 – June 2025

Business Analyst - Intern

- Developed a specialized Power BI dashboard for the HIMT division to streamline and manage the medicine listing process across 403 hospitals handled by HIMT across Indonesia.
- Designed an end-to-end tracking system to monitor the product listing pipeline for 81 types of medicines, providing real-time visibility from the initial submission process to final approval.
- Visualized hospital sales data, medicine availability, and product listing statuses to evaluate market penetration, track listing progress, and support strategic decision-making across nationwide hospital networks.

PROJECT EXPERIENCE

SIMPERIS Application - SDN 02 Kramat Jati (Final Project)

March 2026

Developed Simperis, a mobile-based student ranking application built with Flutter for SDN Kramat Jati 02 using the Simple Additive Weighting algorithm.

- Implemented the Simple Additive Weighting algorithm to calculate and generate student rankings automatically based on academic criteria
- Developed a flexible configuration module to manage evaluation criteria and weight parameters according to school policies
- Created a streamlined system to manage student profiles, academic scores, and evaluation records efficiently
- Integrated a reporting feature to export final ranking results and evaluation reports for school administration

BisnisPintar Application - UPNVJ

Februari 2025

- Creating the UI/UX Menu Display of the BisnisPintar Application containing Home Page, Franchise List Page, News Page, Loan Page, and Tracking Page.
- Creating the Application Interface for the BisnisPintar display with Figma and Flutter.

Project Data Processing and Visualization. - UPNVJ

December 2024

- Transformed and processed data using Pentaho Data Integration, ensuring clean and reliable datasets.
- Designed and developed interactive Power BI dashboards to visualize key insights, improving data-driven decision-making processes.

IKEA - UPNVJ

November 2024

- Redesigned IKEA Indonesia's website UI using the SUS framework to enhance usability.
- Implemented improvements to ensure a seamless and user-friendly experience.
- Refined navigation, layout, and interaction design for better accessibility and efficiency.
- Conducted usability testing to evaluate and optimize the interface based on user feedback.

Sentulgram - UPNVJ	May 2024
- Developed a social media website allowing users to post photos with descriptions. - Implemented core functionalities including user authentication (Login and Register), photo posting, post updating, and post deletion or editing. - Designed an intuitive user interface and ensured responsive web development using HTML, PHP, and CSS. - Optimized the system for seamless user interactions and real-time updates.	
Project Data Warehouse and OLAP. - UPNVJ	March 2024
- Completed end-to-end implementation of data warehouse and OLAP solution, involving database design and ETL processes utilizing Pentaho Data Integration. - Developed and deployed Power BI dashboards to visualize data insights, enabling effective decision-making. Conducted comprehensive data analysis to support business intelligence and strategic planning.	

VOLUNTEERING EXPERIENCE

Mabim FIK UPNVJ 2022 - BEM FIK UPNVJ	October 2022
<i>Event Committee</i>	
- Organizing webinars as part of the event division to maintain the engagement and enthusiasm of all the participants, totaling 150+ people. - Distributing job descriptions evenly among the staff to ensure an efficient workflow system.	

CERTIFICATION

Badan Nasional Sertifikasi Profesi (BNSP)	November 2025
Competent in the area of: Junior/Associate Data Scientist	
International Business Machines Corporation (IBM)	
Competent in the area of:	
- Data Classification and Summarization Using IBM Granite - Code Generation and Optimization Using IBM Granite	October 2025 August 2025
Wadhwani Foundation	Februari 2025
21st Century Employability Skills Program - Intermediate	
Alibaba Cloud	March 2024
Alibaba Cloud Certification	

SKILLS, INTEREST, AND OTHER EXPERIENCE

Skills: Teamwork; Adaptation; Problem Solving; Programming Language(HTML, CSS, JS, PHP, Dart, Flutter(framework)); Interest: Mobile Developer; Web Developer; Data Analyst	
---	--

EXTRA QUALIFICATION

Tools: VS Code, Android Studio, Figma, Canva, Power BI, Microsoft Office (Word, Excel, PowerPoint), Google Workspace (Docs, Spreadsheet, Form) Language: Indonesia (Native); English (Intermediate)
